Hi, I'm Zlatko

FRONTEND DEVELOPER

<u>+8 years</u> of Web development, curious and playful in exploring the internet playground.

You can find my full resume and projects information at
ZLAJAA1.GITHUB.IO/PRESENTATION
or contact me on vujicic.zlatko@gmail.com

Professional Summary

Hello, my full name is **Zlatko Vujičič** and for the past eight years, I've been working on projects ranging from small websites to complex applications. In addition to traditional web applications, I have also worked on projects involving web games and IoT. Furthermore, I have developed user experiences and functionality for apps on platforms such as Raspberry Pi and SetTop Box.

While working independent in the start, I soon became active in bigger teams on bigger projects, collaborating with designers, QA's and Backend devs. Take a look at my experience for more detailed info.

Work Experience

<u>Freelance</u> - Remote
2016 - Present

Troughout my freelance career I can proudly stand behind collection of websites, email templates and campaigns, 10's of prototypes, 2 big and complex administrational web apps. My freelance journy started on UpWork where I found my first agency WittyCookie and soon after other clients from Canada, England, Holland to Denmark and Russia.

<u>Vitamin2</u> - St. Galen
2018 - 2020

Vitamin2 is marketing company located in Switzerland. Websites are based on GetKirby or TYPO3 cms systems, while more customized projects are based on VueJS. Some of the interesting projects I would like to highligh are game for Zurich University and Solar panels project for St. Galen community.

<u>TeleGo</u> - Belgrade
2017 - 2018

TeleGo provided services of marketing, developing and maintaining applications and projects for some of the biggest clients such as RTS, MTS Telekom, Gemius. At TeleGo, beside developing and maintaining websites, I've been provided with platform diversity and opportunity to work on IoT project which basicly adjusted old vending machine to new functionalities, develop Sport application for MTS SetTop Box and enjoy in integrating Gemius ads system on portals.

<u>Pannovate</u> - Belgrade
2016 - 2017

Pannovate is younger sister of Paneleven, a company that distribute Datacard solutions in banking industry. As industry migrated toward web, my tasks spanned from creating email templates and websites to more complex development of analitics dashboard for in-house products such as TinkAR , an augmented reality project and development, whitelabeling and integration of datacard designer called Genesis.
